# Max Bautista

Photo/Videographer  
Hawalli, Kuwait

## Summary

I started working in the Advertising Agency as an intern in January 2020 until the present. I am currently deputy/apprentice to the main Content Creator and provide the following services:

- As a photographer, I am responsible for capturing visual images through the use of a DSLR camera and related equipment. I work in a variety of settings, including events, and outdoor locations, to create images that are used for a variety of purposes such as commercial, editorial, and personal use.
- As a videographer I specialize in creating video content. The role involves capturing footage of events, people, places, or products for a wide range of purposes. Then I edit all materials in Adobe Premiere; importing, cutting, and arranging footage, adding transitions and effects, syncing audio and video, color correction, and exporting the final video.
- As an Adobe Lightroom artist I create high-quality and visually appealing images that meet the needs of clients.
